

BlackRock SuperSMA Launch

We are pleased to announce that we have recently launched a superannuation version of our market-leading separately managed account (SMA) – the BlackRock CPS. Based on feedback from our adviser clients we expect it will have strong appeal to a broad sector of the superannuation market.

The BlackRock SuperSMA offers the control, transparency and direct share capability of a self managed superannuation fund (SMSF), with additional advantages of professionally managed model portfolios and a full administration service.

The Trust Company (Superannuation) Limited is the trustee of the BlackRock SuperSMA Superannuation Fund (Super SMA) and Grosvenor Pirie is the superannuation administrator. Insurance cover is available through the BlackRock SuperSMA from AIA as part of the offering, with choice of death cover, total and permanent disability (TPD) cover and income protection cover at competitive premiums.

Grosvenor Pirie, as the administrator of the BlackRock SuperSMA, will provide annual member statements and answer all superannuation-related client queries

Further details on the BlackRock SuperSMA are available from the BlackRock website including:

- PDS and associated forms;
- Adviser & investor flyers profiling key information;
- Frequently asked questions; and
- A registration page for advisers to register to use the BlackRock SuperSMA
